LISTING OF CLAIMS

1. **(Currently Amended)** A computer-implemented method, comprising the steps of:
displaying a summary view of one or more ~~documents~~ entries to a user, wherein each of the one or more entries is associated with a document, and wherein each of the one or more entries includes summary data regarding the associated document;
enabling the user to select one or more of the ~~one or more entries~~ documents listed in the summary view;
receiving ~~instructions~~ input from the user to create a reusable list of ~~one or more the~~ selected ~~documents~~ entries and to store the list in a system clipboard; and
creating the reusable list of the ~~one or more~~ selected ~~documents~~ entries and storing the reusable list in the system clipboard in response to the input received ~~receiving the instructions~~ from the user, wherein
for each of the one or more selected ~~documents~~ entries, the list includes document summary data pertaining to the ~~selected document~~ associated with the selected entry, and a hyperlink to the ~~selected document~~ associated with the selected entry, and wherein the list can be pasted into one or more documents or transferred to one or more programs in addition to the program displaying the summary view.
2. **(Currently Amended)** The method of claim 1, wherein the document summary data pertaining to the ~~selected document~~ associated with the selected entry and the hyperlink to the ~~selected document~~ associated with the selected entry are combined so that the user can click on the document summary data itself to activate the hyperlink.
3. **(Currently Amended)** The method of claim 1, wherein the one or more entries are associated with ~~documents~~ are electronic mail messages.

4. **(Currently Amended)** The method of claim 1, wherein the one or more entries ~~documents~~ are associated with documents that were found by an Internet search engine.
5. **(Currently Amended)** The method of claim 1, wherein the one or more entries ~~documents~~ are associated with messages that are included in a discussion thread.
6. **(Currently Amended)** The method of claim 1, wherein the step of enabling the user to select one or more of the ~~one or more documents~~ entries comprises the step of displaying a check-box for each of the ~~one or more documents~~ entries, wherein the user selects a ~~document~~ an entry by placing a mark in the check-box associated with the ~~document~~ entry.
7. **(Currently Amended)** The method of claim 1, wherein the step of creating the reusable list further comprises the step of inserting the document summary data and the hyperlinks included in the reusable list into one or more rows of a table, and wherein the table is stored in the system clipboard.
8. **(Currently Amended)** A computer system, comprising:
 - means for displaying a summary view of one or more ~~documents~~ entries to a user, wherein each of the one or more entries is associated with a document, and wherein each of the one or more entries includes summary data regarding the associated document;
 - means for enabling the user to select one or more of the ~~one or more documents~~ entries listed in the summary view;
 - means for receiving instructions input from the user to create a reusable list of ~~one or more~~ the selected documents entries and to store the list in a system clipboard; and
 - means for creating the reusable list of the ~~one or more~~ selected ~~documents~~ entries and storing the reusable list in the system clipboard in response to ~~receiving the instructions~~ the input received from the user, wherein
 - for each of the one or more selected ~~documents~~ entries, the list includes document summary data pertaining to the ~~selected~~ document associated with the selected entry, and a hyperlink to the ~~selected~~ document associated with the selected entry, and wherein the list can be

pasted into one or more documents or transferred to one or more programs in addition to the program displaying the summary view.

9. **(Currently Amended)** The system of claim 8, wherein the document summary data pertaining to the ~~selected document~~ associated with the selected entry and the hyperlink to the ~~selected document~~ associated with the selected entry are combined so that the user can click on the document summary data itself to activate the hyperlink.
10. **(Currently Amended)** The system of claim 8, wherein the one or more entries ~~documents~~ are associated with electronic mail messages.
11. **(Currently Amended)** The system of claim 8, wherein the one or more entries ~~documents~~ are associated with documents that were found by an Internet search engine.
12. **(Currently Amended)** The system of claim 8, wherein the one or more entries ~~documents~~ are associated with messages that are included in a discussion thread.
13. **(Currently Amended)** The system of claim 8, wherein the means for enabling the user to select one or more of the ~~one or more documents~~ entries comprises means for displaying a check-box for each of the ~~one or more documents~~ entries, wherein the user selects ~~a document~~ an entry by placing a mark in the check-box associated with the ~~document~~ entry.
14. **(Currently Amended)** The system of claim 8, wherein means for creating the reusable list further comprises means for inserting the document summary data and the hyperlinks included in the reusable list into one or more rows of a table, and wherein the table is stored in the system clipboard.
15. **(Currently Amended)** A computer readable medium having computer readable program code embodied therein, the computer readable program code comprising:

computer readable program code for displaying a summary view of one or more entries ~~documents~~ to a user, wherein each of the one or more entries is associated with a document, and wherein each of the one or more entries includes summary data regarding the associated document;

computer readable program code that enables the user to select one or more of the ~~one or more entries~~ documents listed in the summary view;

computer readable program code for receiving ~~instructions~~ input from the user to create a reusable list of ~~one or more~~ the selected entries ~~documents~~ and to store the list in a system clipboard; and

computer readable program code for creating the reusable list of the ~~one or more~~ selected entries ~~documents~~ and storing the reusable list in the system clipboard in response to ~~receiving the instructions~~ the input received from the user, wherein

for each of the one or more selected entries ~~documents~~, the list includes document summary data pertaining to the ~~selected~~ document associated with the selected entry, and a hyperlink to the ~~selected~~ document associated with the selected entry, and wherein the list can be pasted into one or more documents or transferred to one or more programs in addition to the program displaying the summary view.

16. ***(Currently Amended)*** The computer readable medium of claim 15, wherein the document summary data pertaining to the ~~selected~~ document associated with the selected entry and the hyperlink to the ~~selected~~ document associated with the selected entry are combined so that the user can click on the document summary data itself to activate the hyperlink.

17. ***(Currently Amended)*** The computer readable medium of claim 15, wherein the one or more entries ~~documents~~ are associated with electronic mail messages.

18. ***(Currently Amended)*** The computer readable medium of claim 15, wherein the one or more entries ~~documents~~ are associated with documents that were found by an Internet search engine.

19. **(Currently Amended)** The computer readable medium of claim 15, wherein the one or more ~~entries~~ ~~documents~~ are associated with messages that are included in a discussion thread.

20. **(Currently Amended)** The computer readable medium of claim 15, wherein the computer readable program code for enabling the user to select one or more of the ~~one or more~~ ~~entries~~ ~~documents~~ comprises computer readable program code for displaying a check-box for each of the ~~one or more~~ ~~entries~~ ~~documents~~, wherein the user selects an entry ~~a document~~ by placing a mark in the check-box associated with the entry ~~document~~.

21. **(Currently Amended)** The computer readable medium of claim 15, wherein the computer readable program code for creating the reusable list further comprises computer readable program code for inserting the document summary data and the hyperlinks included in the reusable list into one or more rows of a table, and wherein the table is stored in the system clipboard.

22. **(Original)** A computer signal embodied in a carrier wave readable by a computing system and encoding a computer program of instructions for executing a computer process performing the method recited in claim 1.

23. **(Currently Amended)** A computer-implemented method, comprising the steps of:
displaying a summary view of one or more documents to a user, wherein each of the one or more entries is associated with a document, and wherein each of the one or more entries includes summary data regarding the associated document;

enabling the user to select one or more of the ~~one or more documents~~ entries listed in the summary view; and

creating a reusable list of the ~~one or more~~ selected ~~documents~~ entries and storing the reusable list in a system clipboard in response to receiving instructions input from the user, wherein

for each of the one or more selected ~~documents~~ entries, the list includes document summary data pertaining to the ~~selected~~ document associated with the selected entry and a

hyperlink to the ~~selected~~ document associated with the selected entry, wherein the summary data ~~pertaining to the selected document~~ includes all summary data pertaining to the ~~selected~~ document associated with the selected entry that was included in the summary view, and wherein the list can be pasted into one or more documents or transferred to one or more programs in addition to the program displaying the summary view.

24. (New) A computer-implemented method, comprising the steps of:

displaying a summary view of one or more entries to a user, wherein each of the one or more entries is associated with a document, and wherein each of the one or more entries includes summary data regarding the associated document, the summary information including at least one of an author associated with the document or a date associated with the document or a subject associated with the document;

enabling the user to select one or more of the entries listed in the summary view; and

creating a reusable list of the selected entries and storing the reusable list in a system clipboard in response to receiving input from the user, wherein

for each of the selected entries, the list includes document summary data pertaining to the document associated with the selected entry and a hyperlink to the document associated with the selected entry, and wherein the list can be pasted into one or more documents or transferred to one or more programs in addition to the program displaying the summary view.

25. (New) The method of claim 24, wherein the document summary data further includes a filename of the associated document.
